FOUNDER & CEO

LADACIA K. WESTFIELD

Founder, President & Chief Executive Officer

Chief Global Freight, Logistics & Supply Chain Coordinator

15+ YEARS OF FREIGHT & LOGISTICS EXPERIENCE

From commercial trucking and owner-operator entrepreneurship to the vision for an AI-powered global supply chain enterprise.

PMG | FOUNDER BIOGRAPHY

FROM THE ROAD TO GLOBAL LEADERSHIP

Ladacia K. Westfield began his professional journey as a commercial driver, learning freight transportation through firsthand experience with loading docks, long-distance operations, delivery schedules, and the economics of commercial transportation. Over more than 15 years, he developed experience spanning first-party (1PL), second-party (2PL), third-party (3PL), and fourth-party (4PL) logistics environments. His progression into owner-operator entrepreneurship laid the foundation for PMG Global Freight & Logistic Corp.

TECHNOLOGY, EDUCATION & INNOVATION

Westfield describes himself as a self-taught computer scientist, software engineer, and technology innovator. He is continuing his education at Central Connecticut State University, with interests in construction management, engineering, and business leadership. He identifies as a top prospect for executive business education at the Wharton School of the University of Pennsylvania and the Massachusetts Institute of Technology (MIT); this designation does not represent confirmed admission or enrollment.

THE PMG VISION

As Founder, President and CEO, Westfield is developing PMG toward an artificial intelligence-powered fifth-party logistics (5PL) model, integrating supply chain coordination, freight transportation, warehousing, digital infrastructure, and automation. His longer-term vision includes advanced transportation systems, electric vehicles, autonomous-ready commercial trucks, and proposed space cargo transportation technology. These initiatives represent strategic ambitions and development concepts, not claims of existing commercial operations.

LEADERSHIP PHILOSOPHY

Westfield emphasizes perseverance, independent learning, operational discipline, and the belief that practical experience can inform transformational innovation. His aspiration is to build PMG into a globally recognized, Fortune 500-caliber corporation while supporting American manufacturing, workforce development, and Connecticut-based industrial growth.

“I started with a CDL and a vision. I taught myself the technology, survived the failures, and built PMG from the ground up. The road was hard—but every mile was worth it.”

— Ladacia K. Westfield | Founder, President & CEO
