PMG / CORPORATE WEBSITE EDITION

Intelligent Global Logistics

Plenty Money Guaranteed Global Freight & Logistic Corp

2026-2040 Corporate Vision, Services & Technology

Think beyond freight. Build what comes next.

A connected vision for the world’s supply chains. Logistics expertise, intelligent technology, and infrastructure designed to move business forward.

Private corporation | Planned corporate headquarters: Greenwich, Connecticut

Prepared November 3, 2026 from the website version published October 12, 2026.

Future fleet imagery is conceptual. Fleet, warehouse-network and multitrillion-dollar ambitions are strategic goals, not current scale or valuation.

Company-provided technology figures are reproduced as company-reported information. Future development targets remain labeled as ambitions.

The PMG horizon / 2026-2040

A global vision. A deliberate path.

Build capabilities in stages. Connect the operation. Scale with evidence, capital, and qualified partners.

2030 fleet target | 30,000 | Dedicated autonomous trucks

Future network goal | 500+ | Warehouse locations across North America

2040 corporate ambition | Multitrillion-dollar | Global freight, logistics & technology enterprise

Strategic ambitions-not current fleet size, facility ownership, enterprise valuation, or guaranteed outcomes. Timing depends on funding, technology, operating execution, and approvals.

Horizon	Strategic focus
2026 - Foundation	Customer and partner engagement; service planning; corporate structure; technology architecture and project scoping.
2030 - Fleet ambition	Pursue the 30,000-truck autonomous fleet target, supported by financing, technology partnerships, regulatory readiness and operating infrastructure.
2035 - Connected scale	Explore integration across warehouse, fulfillment, transportation and delivery networks. This is a planning horizon, not a committed deployment schedule.
2040 - Global horizon	Long-term ambition: a multitrillion-dollar freight, logistics and technology corporation. An aspiration, not a current valuation, financial forecast or investment guarantee.

PMG Supply Chain Solutions Overview

Efficiency. Visibility. Agility. Three priorities behind PMG’s approach.

PMG provides third-party logistics (3PL) solutions that connect warehousing, transportation, fulfillment, packaging, and distribution into a coordinated operation designed to improve performance across your supply chain. Our technology-driven vision focuses on greater efficiency, visibility, and agility.

From warehousing, fulfillment, transportation management, and distribution to co-packing, inventory management, and final-mile delivery, PMG brings integrated supply chain solutions together around your business needs.

Our strategy combines technology investment, qualified operational partners, and a goal of nationwide scale to help companies optimize performance, enhance customer experience, and adapt to changing market demands.

Our scalable solutions combine advanced technology and operational expertise to help businesses improve visibility, reduce complexity, and create more efficient and responsive supply chain operations.

Warehouse automation & technology-driven visibility Technology-enabled operations

Flexible warehousing & inventory management Customized services

Dedicated transportation, freight brokerage & transportation management Integrated services

Co-packing, kitting, assembly & reverse logistics Customized services

Specific services, operating capacity, licensed activities, and technology availability are confirmed for each engagement.

Technology-Driven Port2Door™ Supply Chain Solutions

Port2Door™ Solutions

Engineered to Overcome Supply Chain Challenges

Build a customized supply chain plan with a vision for technology to power it and people to operationalize it. PMG’s approach targets greater flexibility, efficiency, and sustainability across the journey from port to door.

Coordinate the arrival

Plan around cargo readiness, terminal requirements, pickup windows, and handoffs with qualified logistics partners.

Plan the inland move

Align transportation requirements, equipment, transfer points, and shipment milestones in one coordinated plan.

Complete the delivery plan

Define destination requirements, appointment windows, receiving instructions, and proof-of-delivery expectations.

Our service approach spans fleet and maintenance partnerships, dedicated transportation, transportation management, freight brokerage, warehousing, contract packaging and manufacturing partnerships, e-commerce and omnichannel fulfillment, and last-mile delivery-from port to door and the steps in between. Service scope, partner coverage, and technology requirements are tailored to each engagement.

From the port. To your customer’s door.

Connected supply chain and transportation solutions, shaped around your next move.

From the port to your customer’s door, PMG delivers seamless, end-to-end supply chain and transportation solutions. Backed by dynamic technology and operational expertise, we help you move faster, gain visibility, and build a supply chain that adapts to whatever comes next.

Where is your supply chain under pressure?

Whether inventory is stuck at the port, warehousing presents challenges, delivery windows are missed, or transportation becomes complex, today’s supply chains face constant disruption. PMG Ship2Door™ is built to address these challenges-connecting every step with technology, people, and infrastructure to deliver with precision.

Keep freight moving

Connect port pickup and drayage requirements with the next stage of your logistics plan.

Coordinate the middle

Align inventory, warehouse operations, transportation requirements, and delivery schedules.

Complete the journey

Bring customer delivery and returns into the same coordinated supply chain approach.

From drayage and warehousing to final-mile delivery and returns, we customize our solution whether you need an end-to-end approach or support for specific stages-so you can meet customer expectations, reduce risk, and scale with confidence.

01 / Freight solutions

Every shipment starts with a better plan.

Discuss your lane, equipment needs, and delivery requirements with PMG. Service availability and capacity are confirmed for each opportunity.

Dedicated freight

Planning for recurring lanes, dry van requirements, drop trailers, and consistent shipper schedules.

Regional logistics

A regional focus on Connecticut and the Northeast, with opportunities to build connections across U.S. markets.

Business partnerships

Connecting with shippers, qualified carriers, technology providers, and infrastructure partners to shape the PMG network.

Supply Chain Solutions Customized for You

Your operation. Your data. Your goals. A plan shaped around all three.

Whether you’re an emerging or well-established business, PMG’s approach begins with assessing your operation, data, and goals to develop a technology-driven supply chain plan tailored to your needs.

Choose your scope

Discuss an integrated third-party logistics plan or individual services aligned with your business priorities, operating requirements, and growth goals.

Connect key services

Evaluate warehouse and order fulfillment, distribution management, transportation management, e-commerce and omnichannel fulfillment, and last-mile delivery.

Add value at every step

Explore kitting, embroidery, labeling, co-packaging, co-manufacturing, and research and development partnerships to support customer expectations.

Service options are subject to confirmed PMG or qualified partner capabilities, coverage, and project requirements.

Warehousing & Distribution Management

More control. A clearer view of inventory.

A tailored warehouse strategy built around your inventory, service requirements, and changing business demands.

PMG’s warehousing and distribution approach aims to improve inventory control and shipment visibility through coordinated processes, qualified facility partners, and appropriate technology. Planning can evaluate dedicated or multi-client facilities and short- or long-term arrangements, subject to available capacity.

Facility & process design

Assess existing warehouses or new facility development, including layout, equipment, workflow engineering, and automation where it supports the operation.

WMS & actionable data

Evaluate warehouse management system integration, digital inventory information, analytics, and shipment milestones to support continuous improvement.

People & freight flow

Plan staffing and training with operational partners, assess continuity for existing teams, and explore cross-dock options to streamline freight movement.

Facility access, staffing, systems integrations, automation, cross-dock coverage, and visibility capabilities are confirmed during project scoping.

The right plan. For every freight move.

Discuss dedicated transportation, transportation management, and freight brokerage requirements with PMG.

PMG’s transportation strategy connects equipment requirements, qualified carrier partnerships, and technology planning to support inbound and outbound freight. Each engagement starts with your lanes, shipment profile, delivery expectations, and capacity needs.

Capacity & equipment

Evaluate truckload (TL), less-than-truckload (LTL), dedicated routes, equipment specifications, driver requirements, and reverse logistics through confirmed service arrangements.

Network & scheduling

Develop lane and network plans, pickup and delivery schedules, freight consolidation opportunities, and clear coordination across shipment handoffs.

Visibility & freight controls

Assess shipment milestone data, reporting, freight bill auditing, and payment workflows with appropriate systems and operating partners.

Transportation availability, carrier qualifications, applicable authority, equipment, and technology capabilities are confirmed before engagement.

E-commerce Fulfillment

Fulfillment shaped for your next stage.

A scalable 3PL approach for everyday orders, seasonal peaks, and changing customer expectations.

PMG’s e-commerce fulfillment approach combines innovative technology, strategically located fulfillment partnerships, and data-driven insights to fit your current needs while supporting business growth. Each plan considers customer experience, order profiles, inventory requirements, and delivery expectations.

Inventory & orders

Plan inventory management, order fulfillment, and value-added services around your products, sales channels, and customer requirements.

Shipping & returns

Coordinate transportation requirements and returns management through confirmed operating partners and service arrangements.

Growth & peak planning

Assess capacity for long-term growth, peak volumes, seasonal upticks, and unexpected surges, with plans tailored to demand.

PMG EShip™ - proprietary fulfillment technology Technology platform

500+ e-commerce warehouse locations across North America Future network goal

The 500+ warehouse network remains a future development goal. Facility access, integrations, service levels, and capacity are established during project scoping.

Last Mile Delivery. Your brand, all the way home.

Flexible delivery planning and integrated returns options tailored to your products and customer needs.

PMG Last Mile brings tiered delivery options and returns management into a coordinated plan so you can focus on your core business. For big and bulky products, we tailor market coverage, service costs, network visibility, and the customer experience at the doorstep to your business.

The right service tier

Define the delivery experience your products require and select a service scope aligned with customer expectations and budget. Pricing and coverage are confirmed in your service proposal.

White glove options

Discuss specialized handling and white glove delivery requirements with qualified partners, with service details defined before engagement.

Integrated returns

Plan returns coordination and reverse logistics to support order fulfillment, control avoidable costs, and preserve your brand experience.

Our goal is efficient outsourced delivery that extends your reach while maintaining brand integrity. Each solution is shaped around the services you need.

Delivery coverage, service tiers, handling requirements, and returns processes are tailored during project scoping.

02 / Our direction

Rooted in the Northeast. Thinking beyond it.

PMG’s strategy begins with focused regional relationships and grows toward a connected national logistics network.

Connecticut & Northeast Regional focus

U.S. dedicated lanes Growth opportunities

Global connections Long-term vision

Future Infrastructure

The foundation for PMG’s next chapter.

A development vision linking corporate leadership, logistics facilities, autonomous transportation, and digital systems.

Greenwich corporate office

Planned home corporate office and headquarters in Greenwich, Connecticut, supporting executive leadership, investor relations, and network strategy.

Warehouse & terminal network

A future goal of 500+ warehouse locations across North America, with distribution facilities, fulfillment operations, cross-dock connections, and freight terminals.

Autonomous fleet infrastructure

Planning for maintenance, energy, dispatch, and technology infrastructure to support the target of 30,000 dedicated autonomous trucks by 2030.

Future infrastructure is a development vision. Locations, capacity, funding, technology deployment, and project schedules remain subject to implementation planning.

Technology & Innovation

The future of logistics. Powered by innovation.

Technology investment, strategic partnerships, and customer-focused development across the supply chain.

PMG invests in and develops innovative technology to power your supply chain. Our approach combines strategic partnerships with automation OEMs and targeted technology pilots to implement solutions where they make operational sense and deliver customer value.

Visibility helps teams proactively manage exceptions as goods move through the supply chain. Connected information and real-time collaboration bring people together to resolve issues faster and coordinate the next action.

Ever better™ World of Logistics

Discover how PMG 2040 Supply Chain Solutions can make the world Ever better™.

Ever Optimizing

Engineered behind the scenes. Built to move you forward.

Detailed processes. Customized logistics. Continuous improvement.

Successful supply chains rely on intricately engineered processes and solutions designed to respond to disruption, meet consumer demand, and support business growth.

At PMG, we work behind the scenes to create detailed, smoothly coordinated supply chains through customized logistics services, warehousing, transportation, e-commerce fulfillment, last-mile delivery, and innovative technology.

You can focus on creating your products while we design ways to get them to market faster.

Built around your business

Different industries. Connected requirements.

Start with the needs of the business. Select the services, information, and operating plan that fit.

Inventory to customer.

Fulfillment, delivery planning, and returns coordination.

Inputs to production.

Inbound freight, scheduling, distribution, and repeat lanes.

Stock to destination.

Warehouse requirements, inventory control, and network planning.

Delivery to experience.

Service tiers, handling requirements, and customer handoffs.

Intelligent operations / Interactive concept

See the handoffs. Coordinate the next move.

An illustrative control-tower interface exploring how PMG’s technology vision could connect each stage of a shipment.

This demonstration uses illustrative workflows. It is not live tracking, a quote, or a connection to PMG’s operating systems.

Align the port-to-door handoffs.

Coordinate cargo readiness, pickup requirements, warehouse availability, and destination appointments before execution.

Illustrative workflow	Stages and coordination priority
Port-to-door	Port readiness → inland movement → warehouse handoff → customer delivery. Align cargo readiness, pickup requirements, warehouse availability and destination appointments.
E-commerce	Inventory → order preparation → shipping → customer experience. Align inventory, handling instructions and service levels around the customer promise.
Returns	Return request → collection → assessment → resolution. Define returns handling, information handoffs and disposition requirements.

PMG Insights

Additional Insights From PMG AI Global Freight & Logistic Corp

Perspectives on connected logistics, intelligent operations, and the infrastructure of tomorrow.

Turn information into coordinated action

AI planning begins with dependable data and clear operating workflows. PMG’s technology vision connects visibility, exception management, and collaboration across the supply chain.

Connect the handoffs that matter

Port readiness, warehouse capacity, transportation schedules, and customer delivery must work together. PMG Ship2Door™ brings these stages into one customized approach.

Build the foundation before scaling

PMG’s 2030 autonomous-fleet target links technology development with infrastructure, funding, operating partnerships, and implementation planning.

4PL vs. 5PL

Choose the level of coordination that matches the complexity of your operation.

Dimension	4PL - Fourth-party logistics	5PL - Fifth-party logistics
Primary focus	Design and manage a business’s end-to-end supply chain.	Coordinate broader supply chain networks through integrated technology.
Provider coordination	Align carriers, warehouses, and 3PL providers under a lead management approach.	Orchestrate 3PL and 4PL services across connected networks.
Technology role	Support planning, visibility, and performance management.	Enable network-level integration and digital coordination, often for complex e-commerce operations.
Typical fit	A business seeking unified management of multiple logistics providers.	Operations needing extensive coordination across interconnected logistics networks.

Usage varies across providers, particularly for 5PL. These models describe management scope; they do not by themselves certify a provider’s capabilities.

AI in 2040 Supply Chain Operations

A long-term exploration of how intelligent systems could connect planning, execution, and decision-making.

Anticipate demand & disruption

PMG’s 2040 vision explores AI-assisted demand forecasting, inventory planning, and scenario modeling to help teams evaluate risks and prepare responses.

Connect autonomous operations

Explore coordinated scheduling across autonomous freight, warehouse robotics, and delivery systems, subject to technology maturity and operating requirements.

Keep people accountable

Pair automation with human oversight, data protection, cybersecurity, documented decisions, and escalation paths for exceptions.

The goal is a connected operating model in which information supports timely decisions across port, warehouse, transportation, fulfillment, and final-mile activities. The appropriate degree of automation would depend on service requirements, evidence of performance, and responsible operational controls.

This is PMG’s 2040 planning vision, not a prediction or a guarantee of future capabilities.

13 / INVESTOR RELATIONS & INQUIRIES

Investor relations / Private corporation

Global ambition. Private ownership.

Plenty Money Guaranteed Global Freight & Logistic Corp is a private corporation with Greenwich, Connecticut designated for its planned home corporate office and headquarters.

Explore a conversation about PMG’s logistics strategy, technology development, infrastructure vision, and long-term expansion goals. Our investor-interest portal welcomes individuals, family offices, institutions, investment funds, and strategic corporate partners.

Planned corporate headquarters Greenwich, Connecticut

Ownership Private corporation

Investor engagement Interest & partnership inquiries

Investor-interest portal

Welcomes individual investors, family offices, institutional investors, venture capital/private equity, investment funds, strategic corporate partners and other investors.

The brief requests name, email, organization, investor type, area of interest and an introduction. Areas include general investor relations, autonomous freight technology, warehouse/distribution infrastructure, e-commerce/last-mile operations and strategic partnerships.

The portal creates a local investor-interest brief. It does not submit information to PMG, accept investments or provide private company documents. Introductory information is not an offer to sell securities; any future offering would have its own terms and applicable eligibility requirements.

04 / Start a conversation

Let’s build your next move.

Prepare a shipment brief or partnership inquiry with the details that matter. Use it when contacting the PMG team.

Plenty Money Guaranteed Global Freight & Logistic Corp

Shipment and partnership inquiry brief

The website requests name, company, email, inquiry type, origin, destination and shipment/partnership details. It downloads a text brief locally rather than sending a request. Direct contact details are to be confirmed on the site.
